PROFESSIONAL SUMMARY

Software developer with over 5 years of experience, specialized in frontend with React, Next.js and TypeScript, and with solid full stack skills in Node.js, PHP and relational databases. I have led projects end to end in corporate and international settings, and today I design, build and run in production my own software for small businesses. Focused on code quality, user experience and delivering real business value.

TECHNICAL SKILLS

Frontend	React, Next.js, Astro, TypeScript, JavaScript, Angular, HTML5, CSS3, Tailwind CSS, Bootstrap, Zustand, TanStack Query, Responsive Design
Backend	Node.js, Express, PHP, Laravel, CodeIgniter, C# / ASP.NET MVC, Entity Framework, Java
Databases	PostgreSQL, SQL Server, Oracle, MySQL, SQLite, Redis, non-relational databases
Integrations	REST APIs, Prisma ORM, AWS Cognito, AWS S3, WebSockets, Next Auth, Zod, BullMQ, OpenAI API
Testing & quality	Vitest, Playwright, Sentry
Mobile	Flutter (Dart), thermal printer integration
Tools	Git, GitHub, Azure DevOps, Jira, Docker, AWS, Cloudflare, Scrum, technical documentation
Design / UI	Figma, Adobe XD, Photoshop, Illustrator

PROFESSIONAL EXPERIENCE

Creator & Full Stack Developer | **Gedora (own product)** *February 2026 – Present | Peru*

- Designed and built Gedora end to end, software in production for small businesses that sell through social media, online stores or physical shops: sales, inventory, cash register and orders from a catalog shared by link.
- Dashboard in Next.js, Express API with Prisma and PostgreSQL, job queues on Redis (BullMQ), files on AWS S3 and monitoring with Sentry; marketing website in Astro on Cloudflare Pages (gedora-software.com).
- Built the Lunaris Kids online store (lunariskids.com) on top of the Gedora API: catalog, cart, checkout with Yape, customer account and SEO, with automated tests in Vitest and Playwright.

Frontend / Full Stack Developer | **Stefanini — Client: Laureate (UPN / UPC)** *April 2025 – Present | Lima, Peru*

- Develop and maintain enterprise applications for academic and administrative processes across the Laureate ecosystem (UPN and UPC).
- At UPN, implemented new web modules in React and JavaScript, with validations, refactors and functional improvements to academic workflows.
- At UPC, handle requirements in ASP.NET MVC projects with C#, Entity Framework and Oracle: workflow analysis, issue resolution and improvements.
- Fixed stored procedures in SQL Server and Oracle that feed ETL processes, and delivered API integrations, validations and bulk user creation aimed at operational continuity.

Frontend / Full Stack Developer | **GrowBy – Digital Specialists Hub** *June 2024 – September 2025 | Peru (Remote)*

- Led the development of the company's main platform (versions 1 and 2) with Next.js, Zustand, TanStack Query and AWS Cognito authentication, from layout to production.
- Built Sifrah's activity tracking system for its store network end to end (119 of 120 frontend commits), with Next.js, Next UI, Zustand, Zod and Next Auth.
- Provided ongoing maintenance for Mundo Chachapoyas (React/Next.js) and supported Plan International (Vue.js).

Software Engineer / Frontend Developer | **Ingeniust — Costa Rica** *April – December 2023 · November 2024 – May 2025 | Remote*

- Built the Alx Tiempos web system end to end for sales administration and user management, using Next.js, useContext and Prisma ORM, including database modeling.
- Built the Alx Tiempos mobile sales app in Flutter (Dart + SQLite) with thermal printer integration.
- Supported Adec, an e-learning platform with AI integration, and delivered features for Gesto Digital, an AI platform for grading school assignments.

Full Stack Developer | **Atik Soluciones** *December 2023 – July 2024 | Peru*

- Developed the Mundo Camiones web system for sales, rentals and real-time auctions, using Next.js, Zustand, Next UI, Next Auth and WebSockets.
- Built the layout of Mundo Camiones' customer website and contributed to its Flutter mobile app.
- Maintained the ITC and Alo Booking systems in React.js; at ITC, built the KPI dashboard, reports and carrier and order-status management.

Freelance Web Developer | **Eichtici Dev (Independent Projects)** *December 2022 – March 2023 | Peru*

- Built and deployed landing pages and manageable websites for micro and small businesses, using React.js, Next.js, PHP, Laravel and Docker (including New Rent Car EIRL).
- Handled design, frontend-backend integration and deployment of custom solutions on my own.

Full Stack Developer | **Moreno Enterprise** *March 2021 – October 2022 | Peru*

- Supported CRM projects with Angular, SQL Server and .NET on the backend.
- Redesigned the Escolnet school system with modern, responsive interfaces in PHP and vanilla JavaScript; added new modules in CodeIgniter.
- Designed web template builder modules with PHP, Photoshop, Adobe XD and Illustrator.

Frontend Development Intern | **Creavity** *September 2021 – December 2021 | Peru*

- Helped build new features in projects with Angular, Java, .NET and SQL Server.
- Wrote technical project management documentation following the Scrum methodology.

EDUCATION

Systems Engineering | Universidad Privada Antenor Orrego | *2013 – 2021 | Trujillo, Peru*

LANGUAGES

Spanish: Native **English:** Intermediate (fluent technical reading)
